Summary

I'm currently reading Computer Engineering and love building web sites and fixing programming challenges. I've created numerous projects the usage of HTML, CSS, JavaScript, React, and MySQL—like a university events website and a private productiveness app. When I run into problematic problems, I revel in identifying innovative answers and gaining knowledge of new competencies. Right now, I'm seeking out a improvement function where I can placed my knowledge into exercise, paintings on real tasks, and maintain developing as a developer.

Education

Marwadi University

Bachelors of Technology in Computer Engineering - CGPA : 5.89/10

Completed in January 2026

V S Shah High School

Higher Secondary (12th Science) - 53%

Completed in March 2022

Skill Summary

- **Language** : C++, SQL, JavaScript,python
 - **Framework** : React.js, Tailwind CSS, Bootstrap
 - **Tools** : MS Word, Git, GitHub, MySQL,
 - **IDE** : Visual Studio Code,
 - **Soft Skills** : Time Management, Leadership, Adaptability
 - **Technologies** : MERN, DBMS
 - **Languages Known** : English, Gujarati, Hindi
-

Projects

➤ Doctor Appointment Booking :

I created a Web-Based Application that helps patients find doctors easily with characteristic and book agreements. The platform also allows doctors and administrators to manage their plan safely using role -based access.

➤ Student Course System (MERN)

Built a MERN-based platform with user authentication, course enrollment, progress tracking, and admin dashboard. Implemented real-time chat using Socket.io and designed responsive UI with React and Tailwind CSS.

Certificates

- Programming with Python (Coursera)
 - Python Data Structure (Coursera)
 - Introduction to Networking (CISCO)
 - LINUX ESSENTIALS (CISCO)
 - Database Programming with SQL (Oracle)
 - Android Developer Course - Android Fundamentals(Infosys)
 - Apps with Flutter for begginers by The Net Ninja(cursa)
